SUMMARY

Software Engineer with 7+ years of deep domain expertise in US Tax and Healthcare systems. Proven ability to design dynamic, scalable user interfaces using **Angular** and **React**, powered by backend services engineered in **Spring Boot**, **Node.js** and **Kafka**. Strong leadership experience in driving engineering excellence, enforcing rigorous code quality, and delivering enterprise-grade software.

ACADEMIC PROJECTS

- **Agentic AI Resume Screening & Feedback System** — *React.js, Node.js, LangChain.js, Llama 3.2* Spring '26
Designed and built a full-stack AI web application that evaluates resumes against job descriptions using a three-agent pipeline (Parser → Matching → Feedback). The system generates a transparent match score with actionable improvement suggestions, showcasing applied expertise in LLMs, agentic workflows, and modern full-stack development.
- **Personal Vault & Finance Management System** — *Spring Boot, Angular, PostgreSQL* Fall '25
A full-stack personal productivity app built with Angular and Spring Boot that helps users securely store passwords and manage everyday expenses in one place — combining a credential vault with budget tracking to simplify daily financial and digital life. Implemented with JWT-based authentication, RESTful APIs, PostgreSQL, and a responsive Angular UI.
- **Secure Chat Application** — *Java, Spring Boot, WebSocket, ECDH, REST APIs* Spring '25
Built a Spring Boot-based secure chat app with WebSocket integration, implementing ECDH key exchange for real-time encrypted messaging. Built backend services with Spring Boot and enable real-time message encryption/decryption using WebSocket.

PROFESSIONAL EXPERIENCE

Senior Software Developer | Inventyv Software Services Pvt. Ltd. | Client: Advanced Tax Solutions LLC June '21 – August '24

- Led end-to-end development of a high-revenue Bank-as-a-Service (BaaS) module, enabling EROs to offer direct financial services to taxpayers for refund disbursements.
- Engineered an ERO enrollment pipeline using Angular, Node.js, and Couchbase, integrated with a Spring Boot scheduled job system for secure document transmission to banking partners.
- Spearheaded a complete rewrite of the enterprise e-file module, engineering a dynamic workflow for users to selectively transmit specific IRS and state tax forms.
- Integrated IBM Watson AI into the Solution Center to deliver accurate tax article recommendations, reducing customer tickets by 70%.
- Implemented MFA via Google Authenticator to enforce identity verification and protect sensitive financial data.
- Directed a cross-functional team of 5+ engineers through the SDLC, enforcing agile practices and code reviews for high-quality releases.
- Built scalable full-stack architectures pairing Spring Boot APIs with adaptable frontend workflows to support evolving product requirements.
- Partnered with product and design teams to translate business requirements into polished UI/UX solutions using Figma and modern frontend frameworks.

Software Developer | I-Link InfoSoft Pvt. Ltd. | Client: Advanced Tax Solutions LLC May '16 – June '21

- Engineered features for US tax and CRM platforms using Node.js, Spring Boot, PostgreSQL, Couchbase, Angular, and React.
- Decomposed monoliths into micro-frontends using Webpack 5 Module Federation, enabling parallel development.
- Optimized performance via Cache-First serving, AOT compilation, and lazy loading — reducing load times by 40% and boosting rendering speed by 35%.
- Integrated Billing Tree payment gateway, reducing manual payment processing by 40% through an automated renewal workflow.
- Built a custom Electron desktop printing tool with jCanvas and Spring Boot to automate IRS and state tax form generation.
- Migrated legacy AngularJS to modern Angular (TypeScript), cutting bugs by 40% and boosting performance by 30%.
- Developed reporting RESTful APIs using Node.js and TypeScript, collaborating across the full SDLC from requirements to deployment.
- Worked with DevOps to manage GCP deployments, using Kibana for real-time log monitoring and troubleshooting.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frameworks & Libraries: Angular, React, Node.js, Express.js, Spring Boot, Spring Security, FastAPI, Socket.io, Tailwind, Material UI

Architecture: Micro-frontends, Webpack 5 Module Federation, Web Components, REST APIs, OAuth 2.0, Responsive Design

Databases & Messaging: MongoDB, Couchbase, PostgreSQL, Elasticsearch, Kafka, IndexedDB

Cloud & DevOps: GCP, AWS, Docker, Kubernetes, CI/CD, Kibana, Spinnaker

Tools: Git, Figma, Postman, VS Code, NPM, IntelliJ IDEA

Soft Skills: Engineering Leadership, Agile/Scrum, Mentorship, Cross-functional Collaboration

EDUCATION

MS in Computer Science — City University of New York (CUNY), New York, NY

May '26

BSc & MSc in Computer Applications & IT — KSSBM, Gujarat University, Ahmedabad, India

April '16
